

THIRD PARTY NOTIFICATION APPLICATION

The City of Vineland offers a Third Party Notification Program to help property owners stay informed about potential service disconnections due to unpaid utility bills. Property owners receive a duplicate notice—identical to the one sent to the customer of record—alerting them to any delinquency that could result in service interruption. This program is particularly beneficial for landlords, ensuring they are aware of unpaid balances that may impact their property. **Important Notice:** Property owners are responsible for any unpaid balances left by tenants. If left unpaid, these balances may become a lien on the property. To help prevent such issues, property owners are strongly encouraged to enroll in the program. A separate application must be completed for each tenant. To participate, please complete the application below. Both the customer and the property owner must sign and date the form.
